Well, after having worn out my welcome at the "other" place, I have decided to frequent a friendlier environment, a pleasant place, pleasant, like the new me! I had a very NICE conversation with Wayne today. For those of you looking for a budget driver in the 4" range or a MUCH better driver than the old 1197.....try the Fostex Fe107E. It is a very nice sounding driver and not all that expensive for as good as it sounds. Darn close to the 108 E sigma. The cone, surround, and spider are very much like the original 108 sigma. It is also shielded. Nice to see some buddies here...Take care guys.....from the kinder, gentler, Ed
