SOunds good Jim! Looks like you are wqell on the journey! A supertweeter in my opinion, at least for my speakers was not just a tweak but a NECESSITY. Also, the compensation circuit for bass, when i finally got it working (you haven;t heard it iwth that) made a pretty big difference as well. Given the limitations of the driver and a BR enclosure, i think i have it pretty well tuned now....(maybe i speak too soon!)Can you let us know the address for the audio get tohgether next saturday. thanx-akhilesh
