Sounds like fun, what kind of music and on what front end? What was the overall tone of the event? Loud and rocky or Jazzy, roots? These things help us all to participate and learn; albeit vicariously. I used to belong to the Audio Society but they became too stuffy, an entire meeting devoted to sampling interconnects! Jeez. So even though it seems a small gathering the results appear more meaningful. But the backslapping, while gracious, fails to provide any meat and potatoes for us out here! Great pics of the equipment and tech. stuff from resident audio guru Wayne; what were those two ways in the back? The Pi's are full and realistic which is something I have'nt found to be the case with Single drivers, although I have only heard Lowthers. Anyone else see it that way?
