'Tis Lon. ;-) A more careful reading of the construction notes saysthat the Audax driver used is discontinued and so is not inthe PE catalogue. The Goldwood 8" FR PE part number 290-379 is _again_out of stock but would perhaps model well for the Voigt pipe. Since this driver is selling out on a regularbasis I'm thinking that the driver is being used forcurrent projects since it became available about half a yearago. Followup remarks did say that making a Voigt Pipeincludes a fair bit of luck. Terry Cain has also madethis design.
