Erf. Yeah, what you said. :-) I have been through reading a good amount of Martin'ssite and looked at the designs but I have to depend on textrather than formulas for any understanding.
I am also curious as to why the software by Augspurgherthat's available from _audioXpress_ is not explored or reviewedin the forums. Hell, I have not even seen it reviewed by _aX_ itself. I will take a closer look at your work and come back withq's in a bit. I used the spreadsheet a couple years backbut I even have to refamiliarize myself with the syntax.
