HI Lon,The link does not work... ithink it;s becuase the new melhuish site uses some fancy php software that may preclude linking....or maybe just their server is down! I am facinated by the 2 wya horn...what's the concept here? Hornload the same driver both ways? Wonder what that does to high frequencies and efficiencies? What kind of driver would be suitable for this? Just some initial questions for hte more experienced horn builders amongst us. -akhilesh
