Must be a from here to there problem because I have it in bookmarks. However, I copied the link to myself as mail and couldnot get it either. This may be because the guy Ron took the bogus \*pic\*down. Over at [www.fullrangedriver.com](http://www.fullrangedriver.com) ron's addressis available at the fullrange driver form post called"Does this look familiar?" I was trying to find itand this guy ron responded. Now, on to things we can actually find pictures ofreal projects. ;-)
