Manuel--I'd really like to hear more on those mods---I think I have found a good "advanced" fostex cabinet designer---BD designs at www.diy-systems.com---on that site under speakers there are pics of the singular model---and he has several fostex driversto use and advice on the filters needed or not---I am thinking I can bulid singular boxes for the 206's I have and then save up for some of those 200's they mention---but sure want to know how to install that phase plug ---doesn't those guys at Horne Shoppe "dope" the drivers?? Driver experiments!!!! I need to hit a lottery!!!!

Jim
