If you'd like a low cost (show entrance fee) sample, you can hear for yourself at the RMAF in two weeks. My 350lbs of 2 watt Electronluv monoblocks and parafeed linestage will be there. An Art Audio, a Wavac, A Fi-X 3 watter and a Firstwatter will be in the room. All connected to single drivers with no electrical compensation whatsoever in a large (conifer 3) conference room.TC
