Subject: Doping Posted by jim denton on Mon, 08 Nov 2004 22:23:05 GMT View Forum Message <> Reply to Message

I remember reading the Stereophile review about the Horne Shoppe rear loaded horn that had a Fostex fe 167 9 I think) and that they "jap slapped" it with "dope" on one side of the cone---??? and I have read about several people using "Podgy" on the whizzers---agiain, need to be using a Radio Shack driver that runs 10 or 15 bucks to try out all the variables here----I'll to Steve at Decware as I'm sure he has destroyed a few drivers in the cause---Jim
