Hi everyone,Has anyone heard the new single driver boom box type (i believe the PC term is mini component) system by JVC? It's on display at Sharper Image & Ultimate electronics. It uses wood cone speakers (i believe a Japanese driver designer achieved this) that are biflexed. I heard it. Sounds pretty good. $500. I didn't listen to it critically, but the tone was certainly to my liking. If you haven;t heard it yet, check it out and post here.-akhilesh
