Wellllll.....I got side-tracked with an unlooked for bargain on a pair of JBL 2123's last month so now I have to build the mid-horn and a 4Pi Pro box.....and just yesterday I came across a truly gonzo deal on a famous vintage turntable with an even more famous arm, so..... the finances are in even worse shape (will spin records for food).....could be birdies singing by the time I can order the Fostex'ssss.Then the snow is so deep on the patio I had the table saw fired up in the livng room this morning!
