HI Kane,I would suggest you look at www.parts-express.com, and look for the vifa dome tweeters in the $25 range. They do have one at 95 db, that is very good. It is sealed back, so you can put it anywhere. It's good till 30 KHZ. I have used that one (the part number ecapes me but it costs $25). Good luck, and keep us posted. thanx-akhilesh
