I would like to hear back as to your thoughts on the vales and qualities of Coral Beta 8's drivers----I am looking to find a Fostex upgrade and Supervox and PHY is a big dollar jump (wow--their entry level is more than the corals!) Stil --the pair of Corals will run $650 just for the pair ---cabinet will be extra---and any idea where to find the parameter sheets and maybe some old cab designs---must admit thess are great looking too!! I have 3 pairs of Fostex--and thought it's time to go to another level--- Jim
