Note to Self: Do not use public terminals to respond to forumsthe message will get deleted at there servers. I made a reply here but see that it didn't get through. The price of the 120's put me off. My mltl's from yourspecs are performing very nicely until next upgrade of the FE127 catches me. I'd like to try the 'vtl' some day-- that one with the internalline that looks like a variation on the Jordan vtl.
