I agree to a certain extent Gregg. About the way recordings are made, for one. But do keep in mind the subject was " Why won't a single driver speaker do metal?" NOT , " Why won't a single driver speaker do Classical, jazz or other well recorded music"?I hope you're not saying they don't! I'll get some SPL readings on some of what you call "dynamic music" as well. And post them....regardless of the results.Ed
