Subject: lowther drivers in cabinets Posted by jim denton on Thu, 25 Aug 2005 19:34:58 GMT View Forum Message <> Reply to Message

Reading the links from Lowther America site has guys getting below 60 Hz from Martin Kings cabinets--lower than from the Medellion II which says it only goes down to 60Hz---makes a guy wonder!! and for comment: I think he was still using the Zobel circuit but not the one for Fostex 206's---any feedback??? Jim
