Any experience out there on these drivers ---the sellers are comparing them to Lowther ect ect ect -----and they want near Lowther money---does the rep and \$\$\$\$ compete with Lowther or is this just good hype-----must admit they are sharp looking but then again I'm pretty much just another fool for a good looking red head anyway ( and would like to find a really good \$600 unit too! if anyone has an extra one ---will manuel and box though!)
