I was just reviewing this thread. Not much action on the ol' Extremis but lots of talk on some other ones right now.Still looking for the "Jordan 92s Knockoff" prize winner.But I'm getting the itch to try some drop ins for the MLTLs like the FX120 you mentioned. I have been totallydistracted for months on trying to learn Linux and beyond that,to get sound working. It has been a big job and not doneyet.
