I have a pair of Carolina Audio JSM's which use the Jordan JX92Sdriver in a transmision line enclosure.I also have a pair of Carolina Audio 7S transmission line subs.To bad Jordan doesn't make that driver anylonger.These are the most detailed realisting soundings speakersif heard.The amount of bass detail present from these subs is Astonishing.You can't know what your missing until you hear it.I'm not talking about boom, boom, thud as most speakers are today.They can play the detail of the individual bass note like mostpeople don't even know is there.I ROTFLMAO when I read about "audiophiles" claiming there is noneed for speakers which can play below 40 hz. LOLPoor guys.GTF
