Shane I assure you the DCA5.5M'S indeed do exist and I am ordering the first 50 from China in the morning.I intend to send a pair to Akilesh as soon as they arrive. I have had real problems in freight damage in these overseas shipments, so I just have to keep my fingers crossed and test each unit as they arrive. I should have answered your inquiry sooner, but I have been out of the United States for a while. Your friend in Audio Dave Merrill
