Thanks, The PAWO is certainly on my shortlist, but it seems to me that it is to be used to get a fair amount of bass extension from a smallish enclosure. I understand that the Jordan 92 can be used in sealed, ported, Mass Loaded and T/L enclosures. Can the DCA5.5's also be used likewise, or is it just the sound quality that they share with the Jordans? I am not a tech-savvy person, so explanations will need to be simple. Thanks
