I've started building a pair of Zigmahornets, but I just found out that the Merrill DCA4 drivers are sold out! So, now I'm in trouble! I also found out that the Fostex FE103E Sigma drivers are not longer being sold in Europe or Japan. And I heard that the Fostex FE103E drivers (not the Sigma version) aren't very good. So, could someone please recommend another driver that might work instead? Thank you very much! Mike
