Thanks for replying Akhilesh. I remember hearing your 4's in the PAWO enclosure at Tulsa and remembered you commenting on using a sub with them. I think I'm still going to go for the 4's in a Ziggy not only because of floor space issues and WAF, but for the cheap cost as well. I will run them on their own for a bit, but probably end up adding a sub with an active x-over. I see pairs of the 4's come up for sale once in a while.
