what are the advantages over a series parallel line source.I had come across about 200 radio shack 40-1197(NO MORE ARE FOR SALE THIS IS NOT A SALES PITCH).I have about 75 leftwhat would be the best use and the best efficency for 2 channel.What about a open baffle line array.would the baffles be big.would they integrate well as a midrange for ahorn loaded system lets say 100 HZ to 10K.
