Subject: LA HF horns Posted by DSM on Tue, 27 Jul 2004 02:26:44 GMT View Forum Message <> Reply to Message

Whats the requirements for a Line array HF horn? I notice DDS now makes a dual 1" horn. Not really sure how summation takes place. If its a very narrow vert coverage, does each fill a zone with no overlap? I just can't comprehend that given the required bandwidth and beaming thats happening in the upper octave(s). Wish I could afford ribbons.
