Well this is my concern. I have 70 of the Onkyos too but after listening to one, Im not sure I want to invest the huge amount of time into using them. So I guess what I am going to do is build a slit cabinet, using 16 of the PE 4"ers (8 per cabinet), which will allow me to add a tweeter array on the side of the stacked cabinets, or use a third cabinet in the middle for a single tweeter. Maybe even some Altec 811Bs. This is really just a test to see how a LA sounds. Are plans for the Needles posted somewhat or available? thx taylor
