It took four months because of some unexpected interruptions, but I finally finished my Selah Audio XT-8 line arrays this week. Each enclosure has cherry veneer sides and satin black baffles, and houses eight 7" Vifa XT-18 series midwoofers and eight Fountek JP-2 ribbon tweeters. The enclosures are a bass reflex alignment with four 3" ports and are 72" high, 14" wide, 18" deep, 95dB sensitivity, 16 SET-friendly ohms impedance (12 ohms minimum), recommended amplifier power 3 to 300 watts:) If I can figure out how to move these big boys I'll take them to next year's GPAF. So many speakers, so little time.More information at http://www.selahaudio.com/id52.html
XTended 8 Arrays
