Subject: Re: tweeter horns in the line array? Posted by Eric J on Wed, 29 Jun 2005 18:28:02 GMT View Forum Message <> Reply to Message

Thanks. I did know what CD horns are. I just don't always understand the jargon of audio. You have to understand that I did know most of the jargon 25 years ago, but then children and college expenses and all kind of things intervened, and I was out of the picture for a long time. My own field is clinical school psychology, not audio or electronics. I am pretty sure what the other poster mean about unequal wave fronts (time delay among speakers?) and I'm pretty sure with a combination of time delay adjustment in the electronic crossovers, and placement in the speaker system, that is a fixed deal. But I'm not sure if that's what he is talking about.eric j.
