I'm using a DCX2496 for the line arrays. Great unit for the money.You can feed an analog input or AES/EBU digital input. If you havea SPDIF digital signal, then get a Canare SPDIF to AES/EBUtransformer {~\$20}.I'm also using a Roland M1000 for testing.CD player -> Roland -> DCX2496I've setup a simple test to see if people can hear five a/d .. d/a conversions vs. the digital path with only one conversion, so farnobody can identify either pathway.. /lol
