Subject: coaxial driver Posted by mr hayes on Thu, 13 Jul 2006 20:26:58 GMT View Forum Message <> Reply to Message

Can it be used three or four of them in a line arraya speaker that uses proprietary coaxial driver technology developed by Gradient in Finland and Norway's SEAS; the custom One-Point-Source driver is a highly specialized system which employs an on-axis format ideal for a small listening space. When you hear the rich and beautiful, full-bodied sound that comes out of this little package, only one word will come to mind: "Bravo!" http://www.combak.net/bravo/BRAVO.htm
