Subject: Research regarding Fiberglass insulation and harmonic absorption? Posted by Pinky on Wed, 23 Aug 2006 02:19:18 GMT View Forum Message <> Reply to Message

Does anyone know of any research which shows the varying kinds of sound insulations including Fiberglass on the absorption or lowered transmission of harmonics and harmonic distortion, and especially broken down into even ordered(2, 4,6,8,etc) and odd ordered(3, 5, 7, 9, etc)?Pinky
