My rule is; Same tweeters Same midranges Same woofers Same subwoofers I wouldn't mix different tweeters, mids, woofers. I wouldn't make a woofer array of 7" drivers, then add a 12" - just because - into the same box doing the same job. Either bandpass both to do their own separate job or make a full array of 7" or a full array of 12". Common sense rules.
