>>Any suggestions for improvements will be greatly appreciated!If you want to make a good line array, my suggestion is;1. Don't use RD752. Don't replicate the concept of the XRT2K Here is a collection of line array pictures found in cyberspace,some are commercial line arrays, many are DIY, and only a few are good designs. Study the pictures and send me an email and I'll give you one opinion on which ones to get inspired by.<http://home.pacbell.net/lordpk/speaker//hehe>
