The Digital forum doesn't seem to have any posts, so I'masking it where there's some readers. What kind of soundcard do you use? Mine's Turtle Beach Santa Cruz. What I've found after looking a bit was that alternativesto Creative Labs in the \$40- \$60 range is almost non existent. A couple of off brands available at the online merchants but few brand names. Turtle Beach Not found. Hercules Digifire 7.1 not found.
