>>Someone on the PE forum when to the huge trouble of building a >>huge line array with their mid range covered by 6.5 inch woofers.<http://www.pesupport.com/cgi-bin/config.pl?read=340023>Zedguy doesn't seem interested in fixing his problem because he's hasn't replied to critical questions posted. It's premature to blame his problem on the midwoofers when we know zilch about this design. Right now, based on availability of product, the tweeter is more critical in a line array design because there are only a few good candidates whereas there are tons of midrange candidates.
