>>Someone on the PE forum when to the huge trouble of building a >>huge line array with their mid range covered by 6.5 inch

woofers.http://www.pesupport.com/cgi-bin/config.pl?read=340023Zedguy doesn't seem interested in fixing his problem becausehe's hasn't replied to critical questions posted. It's prematureto blame his problem on the midwoofers when we know ziltch abouthis design.Right now, based on availability of product, the tweeter is morecritical in a line array design because there are only a few goodcandidates whereas there are tons of midrange candidates.
