If you need two parallel blocks, and each is connected in series, this is what it would look like:

(+) | | | (+)-----speaker-----(-) | |  
(+)-----speaker-----(-) | | (+)-----speaker-----(-) | |  
(+)-----speaker-----(-)				
(-)-----speaker-----(+)		(-)-----speaker-----(+)		
	(-)-----speaker-----(+)		(-)-----speaker-----(+)	
		(-)Total impedance of the array will be half the impedance of a		
single driver.
