Someday in the future I will start building my 3 way line arrays,I have collected all 40 drivers but have more obstacles to conquer.It's a four tower design using pure midrange drivers, pro planarsand 15" wideband woofers. For HT, I'd need a seperate monster subwoofer.This is a big project that is geared towards very high SPL with very low distortion, perhaps I can rent it out as a torture device ..... we have vays to make you tawk ...
