Hello,Its been a while since my last post here. Actually, I've been busy finishing Grad classes this past couple weeks (No Child Left Behind means teachers aren't educated enough; thus, we have to get further classes in order to satisfy the new requirements - as if 15 years in the profession and 169 college hours isn't enough!). However, I did get the baffles cut. I wanted to get a good start on the enclosures before I ordered parts. They came today. When PE put this kit together with Fred, they did a bang-up job! Even the mounting screws came in it. I felt like a kid on Christmas morning. Anyhow, I should be able to mount the baffles and move forward in the next week. I'll get pics up as soon as I get a chance to get back in the garage. I swear, between grad school, kids, fast-growing grass, kids, work, and kids, time has become a precious comodity. At any rate, I'm still here, and still working at it. BTW, my SmugMug account has expired- all pics will be posted at my new site - diyaudioproject.com - I'll post here when I get new ones up. Sorry so long, haven't had the chance to get back here in while. Thanks for asking!!!!!!!!!!!:)Rich
