Subject: Bad Recordings?

So almost all his recordings are bad? I find that kind of hard to believe. Surely some of his recordings would turn out to be less that he thought, but not almost all. I can think of one that my wife listens to in the car all the time, and I thought it would be great, but when I brought it inside to my speakers, it turned out to be thin and almost un-listenable. I took it back out to the car. JD
