Subject: Re: limiter operation Posted by Icholke on Fri, 09 Nov 2007 14:28:39 GMT View Forum Message <> Reply to Message

Hi Tom,I read the same- tube before the amp.I asked a EE friend of mine about the operation of a std limiter, and he replied that it eliminates the signal peaks by acting as a variable gain stage. The low level signal recieves more gain and the high level signal less gain. This is often used where a mike is to loud and then to quiet as the singer moves about.-Linc
