Rick set me up with one of his RS8 kits and I've been fighting all winter to put it together. I can officially offer other beginners a tip 'A circular saw is not the tool for this job :)' <http://s261.photobucket.com/albums/ii71/hjagen/?action=view&current=RS-8s-3.jpg> Notice the clamp on the front :). Anyway it's far enough along that I put them together for a listen. Now I know what all the fuss is about! Wow! There is something to be said about the imaging of line arrays. JH
