Hi:I have just obtained a set of Maggie 2.7s. I am a newbie, to be honest, about Maggies. I was wondering about general setup rules for placement in the room.Right now they are about 12 feet apart, about 2.5 feet from the back walls, and 1 foot from the side walls. They are hooked to a Carver sunfire ampThey are sounding pretty forward and they certainly appreciate my Vinyl so farThanks for any suggestions and happy holidays to everyoneTim
