Hi Is there anyone out there?? Or am I the only one. I wish there was more people into planners and ribbon type loudspeakers! Please look at my postings and make a couple of comments or your own set or tweaks you did. Which is better in the long run with out getting listening fatigue if I spelled the right. Is A planner better or a ribbon? Please explain why? Also why do a lot of diyers mod a lot of the ribbons that I see on a lot of diy web sites? What's wrong with the driver in the first place? Why would you spend 500.00 each ribbon tweeter and then take it a part and mod it. I guess some people have money to burn! Also has any one worked with the b.g planners like the neo 8 or 3 sold at parts express .com I was wondering if they sound like the maggies or not or what they sound like? Please e-mail me to let me know or just reply. Have a great day. Thanks
jm
