"aX is just not my cup-o-tea anymore. I hate to let my subscription run out, but I just don't find it enjoyable anymore." My subscription expires this month. I thought long and hard about not renewing but eventually signed up for another year. I made my wife write the check. I don't know why I renewed, other than I have every issue of Speaker Builder which means I have been reading this magazine for almost 25 years. Momentum. It gets more disappointing with every issue and takes less than an hour to read. I don't see it continuing much longer. I remember when SpeakerBuilder was my best source of information and Audio Amateur/Old Colony was the place I ordered classic texts. Maybe I won't have to make the tough decision next year if they just go under. Martin
