Sweet!I'd like to hear that Butler amp. I'll have to check out one someday soon.As for the speakers, I know what you mean. You don't really need all that, 'cause you can hit the low notes very nicely with a much smaller speaker. I mean, if you wanted to just make the loudest sound, that would be one thing. But that's not for listening. You can do everything you want to do with an 8" or 10" driver in a much smaller box.
