New issue of AudioXpress came today.There was one feature on the Sonic Impact t-amp and cardbaord speakers which I'm glad to report was a rave up.This makes me wonder if I should truly let my subscription lapse.I wind up coming back when I've done it before.There are damned few contruction articles though.  If the magazineis going to continue to be little more than a pamphlet, then the subscription price should drop.  That _and_ go bi-monthly orsomething with a better representation of the speakerbuildinghobby.  After all Speakerbuilder was my entry point for the present publication.
