The 240 doors allow for very little depth in the door speakers. There are exceptionally few choices that fit. To get a full sound, I'd be thinking about a system that can easily accommodate a sub either now or in the future so you don't have to back up and start over. I put an Alpine deck with satellite radio and an ipod input module in my 240 wagon and I find it really funny to think about the technologically advanced sound system juxtaposed with the 4 banger cast iron engine and tractor transmission. Still, it runs well and hauls a ton of stuff.
