The 240 doors allow for very little depth in the door speakers. There are exceptionally few choices that fit. To get a full sound, I'd be thinking about a system that can easily accommodate a sub either now or in the future so you don't have to back up and start over.I put an Alpine deck with satellite radio and an ipod input module in my 240 wagon and I find it really funny to think about the technologically advanced sound system juxtaposed with the 4 banger cast iron engine and tractor transmission. Still, it it runs well and hauls a ton of stuff.
